

# JJ Equine

A Natural Choice for the Professional.

## **JJ Mud Fever Treatment.**

Mud Fever is a bacterial infection causing the loss of hair, dryness, bleeding and cracking of the skin on the leg.

### **Directions for use:**

If possible, wash the leg with JJ Shampoo and rinse thoroughly. If you are not able to shampoo, at least rinse off and remove all debris. Apply JJ Mud Fever Treatment as supplied by spray. If your patient is fearful of the spray then apply JJ Mud Fever Treatment using a swab. Swab the affected area liberally and allow to air dry. Repeat the application daily for five days to achieve the best results. During treatment for Mud Fever keep the patient away from damp, muddy areas.

**Ingredients:** Homeo-Harmonised Water (Aqua), "Sterichelle" (Alkyl Dimethyl Benzyl Ammonium Chloride, Alkyl Ethyl Benzyl Ammonium Chloride) and an inert dye.

Full protocols and a range of products are available for quarantine or outbreak incidents.

This product contains no aldehydes, alcohols, chlorines, phenols or parabens for the benefit of you and your horse, while protecting the environmental structure of the planet by being readily biodegradable.

**Caution.** For external use only. Keep out of eyes. JJ Mud Fever Treatment contains Sterichelle™ which is as safe as water to higher living organisms and to the environment. It is however proven to kill various micro-organisms through a broad spectrum so reasonable care should be taken. If ingested or in contact with eyes rinse with water immediately and seek medical attention.

Keep in original container and store in a cool dry place away from children. All empty containers should be recycled using the appropriate facilities offered by your local authority.

**"Sterichelle" is your invisible protector against bacteria, viruses, moulds, fungi, spirochetes, bacterial cysts and fungal spores which are potentially harmful to your horses.**

All test data is available on request.
