JJ Wound Disinfectant

Directions for use:

Use as supplied. JJ Wound Spray is a veterinary grade disinfectant designed to be sprayed directly into a wound after all debris has been removed. After spraying into the wound allow to air dry, unless the wound requires dressing. Repeat the process daily until the wound has healed and your horse is safe from potential infection through the wound.

Ingredients: Homeo-Harmonised Water (Aqua), "Sterichelle" (Alkyl Dimethyl Benzyl Ammonium Chloride, Alkyl Ethyl Benzyl Ammonium Chloride)

Full protocols and a range of products are available for quarantine or outbreak incidents.

This product contains: no aldehydes, alcohols, chlorines, phenols or parabens for the benefit of you and your horse while protecting the environmental structure of the planet by being readily biodegradable.

"Sterichelle" has been tested effective against bacteria, viruses, moulds, fungi, spirochetes, bacterial cysts and fungal spores that are potentially harmful to your horses.

All test data is available on request.

Our mission is to blend traditional medical knowledge into the modern world for the benefit of you, your horse and the environment.
